THE HAVEN AND PEER I

The Haven and Peer I are long term residential substance abuse programs designed to treat men, women and their infant children with chronic histories of substance dependence. The Haven program houses 89 women and 36 of their infant children and Peer I program houses approximately 127 males. Both

programs are designed to assist clients, family members and their children to overcome addiction. The mission of our programs is to promote a major lifestyle change and return people back to the community and their families as productive members of society. Additionally, The Haven helps pregnant women and infant children who are in crisis. Many suffer from homelessness, addictions, childhood abuse, domestic violence, trauma, or mental health issues.

Please come out to Strings and have a nice dinner while helping restore lives with your contributions.
